

## SIDE MARE RESORT & SPA HOTEL ENERGY MANAGEMENT POLICY

As Side Mare Resort & Spa, our goal is to leave future generations a world worth living in, aware of our responsibility for protecting energy resources in accordance with the principles of sustainability. In this direction;

- Meet all national and international legal requirements,
- the consideration of standard, hotel and guest conditions that may influence the management system,
- Providing all necessary information and resources for setting, implementing and reviewing energy goals and objectives,
- Identify our important energy consumption points and work towards the efficient of energy in these areas,
- Regular reporting on our monitored energy performance and dissemination of this information to all relevant parties,
- Developing energy efficiency projects in collaboration with our employees and stakeholders,
- Continuous improvement of energy performance by identifying risks and opportunities to increase sustainable energy efficiency and effectiveness,
- Carrying out all necessary activities to raise awareness of our employees and stakeholders on natural resource consumption and energy efficiency,
- Increased use of renewable energy sources,
- We attach great importance to the high energy class of the newly purchased products and devices,
- We undertake to give priority to planning that takes energy efficiency into account when building new buildings, renovations and conversions in our facilities.
