

## SIDE MARE RESORT & SPA HOTEL ENERGY MANAGEMENT POLICY

At Side Mare Resort & SPA, we believe that continuous improvement of our environmental responsibility and energy performance is one of the cornerstones of a sustainable tourism approach. In this sense, the principles we have adopted in the field of energy management are listed below:

- We are committed to providing the necessary resources to reduce our energy consumption, increase energy efficiency and continuously improve our energy performance, as well as to continually review and improve the effectiveness of EnYS.
- When purchasing, we consider the energy efficiency of the equipment and systems used in our facility and prefer technologies that improve energy efficiency. We regularly analyze the energy consumption of our existing systems and develop improvement projects for inefficient areas.
- We are committed to complying with applicable national and international energy legislation, legal regulations, and other conditions to which we are bound.
- We measure, monitor, and analyze our energy consumption throughout our facility. We regularly establish and review our energy goals and targets in accordance with the data obtained.
- We offer regular training to raise awareness of energy efficiency among all our employees. We encourage the participation of all employees in the energy management process and support continuous improvements through a suggestion system.
- We view combating climate change as a responsibility. We strive to reduce our greenhouse gas emissions by improving energy efficiency, increasing the use of renewable energy sources, and reducing our carbon footprint.
- We strive to invest in increasing the use of renewable energy sources. We conduct feasibility studies on solar energy and other alternative energy sources and utilize these sources where feasible.
- We encourage our suppliers and business partners to prioritize energy efficiency and incorporate energy criteria into our purchasing process.

Our Energy Management Policy is regularly reviewed and updated by senior management and communicated to all stakeholders within our facility. It is published on our website and kept publicly available.
